

## **List of Diabetic Spirits for MD**

**Abbadon, Abdomen infections, Abdomen bloating, abnormal fat metabolism for sugar, Abnormalities, abrupt onset diabetes, absence of vas deferens, Acanthosis Nigricans, Acarbose, accupril, ACE inhibitors, acebutolol, acetazolamide, acetoacetate, acetoexamide, Acetone, acetone in urine, acidic body fluids & blood, acidaminophen, Acidosis, Actos, acute pain, addicted to sugar, alcohol, sugaralcohol, etc, adrenaline, adult-onset diabetes, Adverse effects, affects the body nerves that control body systems, affects digestive system, urinary tract, sex organs, heart and blood vessels, sweat glands, and eyes, kidneys, etc. , Afraid of Dying, & slow death, air hunger, Albuminuria, alcoholism, alcohol excess, alcohol-sugar, Aldose reductase inhibitor, all manner of sickness, & diseases, Allergic reactions to medicines, allergy rashes, allopurinol, aloe vera, Alpha-glucosidase inhibitor, altered blood lipid profiles, & blood flow, alternative medicines & therapies, always thirsty, or tired, Amaryl, Amino acid, amitriptyline, amputation, amylase, Amylin, Amyotrophy, anaerobic use of glucose, Androgen replacement therapy, andropause, angiopathy, anger, Angiotensin conversion enzyme, angiotensin hormone narrowing blood vessels, Angiotensin Receptor Blocker, animal spirits, animal starch, animal insulin, annurism, Anomalies, antibiotic resistance, antibiotics, antidecongestants, antidepressants, Anti-diabetic meds, antibodies against glutamic acid decarboxylase, antibodies against islet cells, antidiuretics, antihistamines, Appolion, ARB's, arterial disease, arthritis, artificial androgens, artificial pancreas, artificial sweeteners, Asa spirit, Aspartame, aspirin, astigmatism, Asymptomatic, Atacand, atenolol, atherosclerosis, athlete's foot, attacks small blood vessels, atypical diabetes, Autoimmune disorders & diseases, autonomic nervous system damage, Autonomic Neuropathy, Avandia, Background retinopathy, bacteria & insulin genes for Human insulin, bacteria making Insulin resistant, bad reaction to insulin, Bardoxolone methyl, barley intolerance, & allergy, Basal medicine, Basal beef insulin, bell's palsy, beef insulin, benzaifibrate, benzalip, Beta Blockers, beta cell - Hyperinsulinism, beta cell destroyer, beta cell destruction, beta cell transplant, Beta-hydroxybutyrate, bezoars, biacin, bicarbonate uterus, buffering system, & therapy, Biguanides, binding glucose to protein, Biosynthetic human insulin, Biphasic insulin, birth defects, birth weight low, Blackwell, bladder problems, bleeding stroke, blindness, blisters to ulcers, bloating, blocked capillaries in the back of the eye, blocked thinking, & understanding, blocked urine, blood diseases, blood eating or drinking, & curse, blood glucose level swings quickly, blood glucose monitoring & reagents, Bloodletting, Blood pressure instability, Blood restricting, Blood sugar fluxuations, too hi or too low, blood tests often,**

**blood thinners, blood vessel damage, blood vessels hardened, blood vessels narrowed, blood vessels weakened, bloodline curse, blurred vision, body attacks itself, body immune system destroying islets, body cells resistant to insulin, body fail to produce insulin, body fail to use insulin, body produce too much insulin, boice, boyce, & boycee & break 3 fold cord in Jesus' name, boils, Bolus of insulin, bondage, Borderline Diabetes, bovine insulin, Botanicals, bowel disease, brain damage, brain tissue killed by stroke causing damage or death, breakdown quickly of GLP-1, breathing problems, breathing rate off, brimoninidine drops, Brittlediabetes, Bronze diabetes, bruise easily, buildup of lactic acid, Bullosis Diabeticorum, Bunyun, burning ague, burning fatty acids, Byetta,**

**C-peptide ameliorate neuropathy and microvascular damage, C-peptide level off, C-reactive protein, calcification in blood vessels, Calcium channel blockers, Calcium ions, cancers, cancer of pancreas, Candida albicans, Candida infections, candor, canker, can't read, understand, or receive from Bible, Capillaries & very small muscles damage, capillaries in the back of the eye balloon and form pouches, Captain Novolin, captopril, carbohydrate tolerance, Carbuncles, cardiogenic shock, cardiomyopathy, cardioselective meds, Cardiovascular disorders, Carpal tunnel syndrome, cataracts, cell damage & frequent infections, cells not utilize insulin, cellulitis, center vision only, cerebral edema, Cerebrovascular disease, Charcot foot, Charcot joint, chemical changes in nerves, Chemical diabetes, Chemical insulin, chemical imbalances, Chemical sweetner, Cholesterol high bad, low good, Cholesterol meds & side effects, Chlorpropamide, chlorthalidone, chromium, Chromium polynicotinate, Chronic Pulmonary Edema, Chronic Somogyi rebound, Ciclosporin, cilliac disease, cilliac wheat allergy, Circulation complications, Circulatory problems, civil war in body, claudication, Clinical trial, guinny pig, clofibrate, clogging of arteries, close control, clyndamycin H C L, codeine, cold feet & hands, cold extremities, colds & recurring, colestipol, colestyramine, colfibrate, coma from lack of insulin, or low glucose, comatose, compensatory respiratory alkalosis, & thirst, Complications, compression mononeuropathy, confusion, Congenital defects with diabetes, & hyperinsulinism, Congestive heart failure, Constipation, Consumption, Continuous subcutaneous insulin infusion, Contrast endogenous, Controlled disease, Conventional insulinothrapy, convulsions, Coronary disease, cortizone, cortisteroids, counter-regulatory hormones, Coxsackie B4 virus, cozaar, cramping muscles & spasms, cranial neuropathy, creation of chromium, crestor, curse of king Asa, curse from going to physician before God, curse of rejecting God, & God's ways, cuts heal slowly to ulcers, Cyclamate, Cystic fibrosis, cytokines, D1 cells, DPP-4 inhibitors, Damage to eye fundus, & retina, damage to microvasculature in the retina, Damage to nerves for senses or muscles, & somatic nerves, damaged small blood vessels, damaged skin nerves, damage**

**to small arteries & microvasculature in feet, Dangerously high levels of ketones, Dapagliflozin, dark hyperpigmentation of skin, Dawn phenomenon, deafness, death & destruction, Deaths from non treatment, Debridement, decline of male-ness, decongestants, decreased blood flow to brain, decreased sensation or feeling, decreased skin turgor, De-sensitization, deepening open wound not heal, dehydration, Delayed food digestion, Delayed gastric emptying, Delta cells, Denial, Deoxyribonucleic acid, depression, desipramine, desmopressin, Desmond diabetes, despair, despondancy, destroy beta cells & islets in pancreas, Destroyer, destroys pro-insulin & insulin, destruction of joints and soft tissue of foot, detached retina, deterioration, dextrol, dextrose form isomer, di-saccharides, Diabeta, diabetes medicines & pills, Diabetologists, Diabetology, Diabetes and pregnancy, Diabetes and testosterone, Diabetes control or lack of control, Diabetes complications, Diabetes insipidus, Diabetes journal, Diabetes mis-management, Diabetes Melitus, Diabetes Mine, Diabetes organizations, Diabetes Duo: Captain Glucose and Meter Boy, Diabetes mellitus, types 1, 1.5, & 2, Diabetes & lack of Care, Diabetic amyotrophy, Diabetic angiopathy, diabetic blisters, Diabetic bulla, Diabetic cardiomyopathy, Diabetic cheiroarthropathy, diabetic coma, nerve & brain damage, Diabetic dermadrome, Diabetic dermopathy, Diabetic diet, Diabetic foot, Diabetic foot ulcer, Diabetic Hypoglycemia, Diabetic ketosis, Diabetic ketoacidosis, Diabetic ketosis coma, diabetic lumbar radiculopathy, Diabetic myelopathy, Diabetic myonecrosis, Diabetic nephropathy, Diabetic neuropathy, Diabetic osteopathy, Diabetic retinopathy, Diabetic shoe, Diabetic sock, Diabetic stiff hand syndrome, diabetic thoracic radiculopathy, Diabetogenic, Diabinese, Diabulimia, Dialysis, diamicon, Diarrhea, Diastolic blood pressure, Diet-induced obesity, dietary supplements, Digital Sclerosis, dihydroepiandrosterone, diltiazem, Dim or Diminishing Vision or hearing, diovan, Dipeptidyl peptidase-4 inhibitors, disappearing bone disease, diseases of evil calamity, disorder of blood sugar metabolism, Disseminated Granuloma Annulare, disorientation, disparity, Disseminated Granuloma Annulare, Distal sensory neuropathy, & polyneuropathy, diuresis, Diuretics, diverse diseases and torments, dizziness, DLife, DM 2 & other diseases for insulin resistance, DNA problems, door closer, cells not open door to utilize insulin, double vision, dropsy, drowsiness, dry mouth, Dupuytren's contracture, Dymelor, Dysglycemia, Ear nerve damage, Easily infected, eating disorders, Edema, edemic feet, Edmonton protocol, effects on the cornea, electrolyte levels, elevated C P K, elevated C K, elevated glucagon, eliminates vision, enalapril, end-organ insulin resistance, end stage renal failure, Endocrine and Metabolic Diseases, endocrine glands and tissues disorders, endogenous insulin, Emotional instability, Enlarged Liver, Environmental Determinants in Young, epidemiology, epidymal cysts, Epinephrine adrenaline hormone, &**

neurotransmitter at sympathetic nerve endings, Erratic blood glucose (sugar) levels, eruptive xanthomatosis, escape, escapism, essential amino acids, ethacrynic acid, Euglucon, Euglycemia, evil calamity, evil diseases of Egypt, excess glucose, salt, & solutes in blood, excess iron damaging body tissues, excessive insulin production from obesity, or insulin resistance, excessive thirst, excessive urination, Exenatide, exhema, exogenous insulin, & testosterone, Extreme Hunger, eye complications, eye damage, eye diseases, eye disorders, eye drops, eye nerve damage, eye treatments, ezetrol, F cells make pancreatic polypeptide, fainting, Familiar spirits, family History of diabetes, fast acting insulin, fast or irregular heart beats, fat metabolism no glucose, fatigue, fatty acids, fear of death, fear of future, fear of suffering, fear of slow death, etc, fears of all kinds, feebleness, feel pins and needles in feet, feet and hands get very cold or very hot, feet damage, feet hurt at night, feet infections, & recurring, feet skin peels and cracks, femoral neuropathy, fenofibrate, fenugreek, fetus defects, Fibrocalculous pancreatopathy, fingers curve inward, First Nations high diabetes rate, Fit4D, Flatbush diabetes, flavinoids, flow of blood interrupted, flu infections & recurring, Fluorescein angiography, Fluorescent glucose biosensor, Focal Neuropathy, Folliculitis, foot bunyons, foot calluses, foot complication, foot problems, foot sores, cuts, foot ulcers, foreign insulin, foreign antibodies, Fractional urine, frequent urination, Frey's syndrome, from another disease, glucocorticoids, & intercurrent illness, from drugs or chemicals, Fructose, fruity smelling breath, Fundus photography, Funduscopy, fungus in mouth, fungus on feet, furosimide, G cell, Gangrene, Gastric bypass surgery, Gastric inhibitory polypeptide, gastroenteritis, Gastroesophageal reflux, gastrointestinal diseases, & mal-absorbtion, Gastroparesis, gemfibrosol, Genentech, Genetic causes, Genetic defects, Genetic diseases, genetic defects of insulin secretion, Gestational diabetes mellitus, giant squid, Gingivitis, Ginseng, Glaucoma, glimepiride, glipizide, Glomeruli damage, Glucagon hormone, Glucagon rescue, Glucagon-like peptide-1 & agonist, Glucerna, Glucommander, Gluconeogenesis, Glucophage, glucose in urine, Glucose clamp technique, glucose fluxuation, glucose tablet, glucose tolerance test, Glucose metabolism anomalies, glucose released by liver, Glucotrol and Glucotrol XL, gluten allergy, gluten intolerance, gluttony, glyburide, Glycated hemoglobin, glycemic density, glycemic efficacy, glycemic index, glycemic load, Glyceroneogenesis, glycogen in liver, Glycogenesis, Glycogenolysis, glycosolated hemoglobin, Glycosuria, Glycosylated hemoglobin, & test, glycosylation, Glynase, Glyset, gnashing teeth, grit teeth, going through, gout infections in joints, gouty artheritis, great plague, great sickness, guilt, gum disease, gum infections and recurring, Hands shrinking in, Hardening of arteries, Hardening of blood vessels, harmful results, Having ketone bodies in urine a warning sign of diabetic ketoacidosis,

headache, hearing damage or loss, heart and circulatory problems, heart attack, heart damage, heart disease, heart muscle blockage, heart palpitations, Heartburn, hematomas in brain, Hemochromatosis, Hemodialysis, hemoglobin A1C & test, hemorrhaging blood vessel, hepatocellular carcinoma, herbal therapy, hereditary forms, & factors, hernia, growth, or tumor pressing on pancreas, high blood carbon dioxide levels, high blood glucose anytime especially in the morning, High blood pressure, high-carb, &/or fiber diets, High levels of ketones or proteins in urine, high lipids, High low-density lipoprotein, or bad colestrol, high risk pregnancy, high total cholesterol, high triglycerides, high uric acid levels, hives or red patches on skin, H L A antigens, hog insulin, hog human islet transplants, holding water weight, Homeostasis disorders, Homeostatic model assessment, Honeymoon period, Honk, hopelessness, Human insulin, Human insulin injections, human islet transplants, Humulin, hycodan, hydralazine, hydrochlorothiazide, hyper-androgenism, Hyperfunction, hyperglycemia, Hyperglycemic hyperosmolar state, Hyperinsulinemia, Hyperinsulinemic Hyperinsulinism, Hyperlipemia, Hyperosmolar coma, Hyperosmolar Hyperglycemic Nonketotic Syndrome, Hyperosmolar hyperglycemic state, hyperosmolar non-ketotic coma, hyperosmolar non-ketotic state, hyperosmolar non-ketotic syndrome, Hyperproinsulinemia, hypertension, hyperventilation, hypertension, Hypofunction, hypoglycemia, & coma, hypogonadism, hypokalemia, hypotension, Hypothala, hypothyroidism, ibuprophen, incretin mimetics, indapamide, Idiopathic hypoglycemia, idiopathic type 1 diabetes, Imeglimin, immune system attack and destroy wrongly tagged protein or cell, immune system out of order, Immunosuppressive drugs, impaired circulation in feet, Impaired fasting glucose, Impaired glucose tolerance, Impaired insulin secretion & action, impaired vision, Impotence, impure pro-insulin, impurities in insulin, inability to respond to insulin, inadequate insulin, & metabolic ketosis, inappropriate antibody reaction to proteins on beta cells, Inborn errors of carbohydrate metabolism, incoherent, incompetence, increased coagulation, increased hematocrit, inflammation, & plasma osmolarity, increased risk for cataract, heart attack, & stroke, increased sensitivity of skin, incurable disease, indigestion & heartburn, infected injection site, infected pancreas, infected ulcers, infections - bacterial, viral, & fungal recurring, infective agents, infertility, infirmities, Inflamed skin tissues, inflammation, & irritation of pancreas, inflexibility of arterial walls, influenza recurring, Infusion set, Ingestion of high sugar food, & drink, Inhalable insulin, inherited diabetes, Iniquities of ancestors, fathers & mothers, injection sites, injections, inner ear infections, insufficient glucose absorption, insulin binds with proteins that tag antigens, Insulin degludec, Insulin destroyer, Insulin detemir, Insulin glargine, Insulin glulisine, Insulin index, Insulin intolerance, insulin intolerant, Insulin lispro, Insulin port, Insulin reaction, insulin reaction while asleep, Insulin

receptors malfunction, Insulin rejections, Insulin resistance, Insulin shock, Insulin spillover, Insulin therapies, Insulin shock therapy, insulin-dependent diabetes mellitus, Insulin-induced atrophy, & hypertrophy, Insulin, allergy, analogs, antagonists, aspart, & binding, Insulinoma, Insulinitis, Intensive insulinotherapy, & management, interactions, intermediate-acting insulin, Intermittent claudication, Intestine infections recurring, Intramuscular, & Intravenous injection, irrational behavior, irregular heart beats, irritation and swelling of nerves, Irritation, Irritability, Ischemia, ischemic blocked blood vessel, Islets of Langerhans, Islets transplant, isosorbide dinitrate, Itching skin, itchy or burning fungal infection, Itchy skin rashes, JDRF, Januvia, jaundice, jock rash, jock itch, juvenile diabetes, Juvenile onset diabetes, juvenile overweight, juvenile type 1 diabetes, juvenile type 2 diabetes, K-ATP channel forms of neonatal-onset diabetes, ketoacidosis, Ketogenic diet, Ketone bodies, & smell, ketones high levels, Ketonuria, Ketosis-prone, or resistant diabetes, Ketosis, Ketotic hypoglycemia, kidney damage, kidney diseases, kidney destroyer, kidney filtration rate low, kidney malfunctions, Kidney Replacement Therapy, kidney transplant, kidney-lung-heart blood pressure control disorders, Kidney trouble to excrete excess salt, glucose, & solutes, with water, KPD, Kussmaul breathing, & respiration, labetalol, Labile diabetes, lack of appetite, lack of intestinal control, lack of oxygen, lacking strength, lackluster, Lactic acidosis, Lactose enzyme lost, lactose intolerant, lameness, Laminopathy, Laser eye surgery treatment, & scar damage, Latent autoimmune diabetes, latent diabetes, leak point, leaking blood vessels, leaking capillaries behind retina, lens shape changes, Lente insulin, less feeling in feet, lethargy, Lifestyle causes of DM type 2, Limited joint mobility, lipase, lipid lowering meds, lipidil, lipidil supra, lipidor, lipids, lipto-dermatose-sclerosis, lipitor, liver converts excess glucose, Liver damage from meds, Liver diseases, loathsome disease in loins, Localized itching, & rashes, long acting insulin, long-term complications, long-term insulin coverage, loop diuretics, loss of consciousness, Loss of foot bone temporarily, loss of glycemic control, loss of pupillary light reflex, Loss of reflexes, loss of sensation to feet and lower legs, loss of strength, or muscle control, lovastatin, low antidiuretic hormones, low blood pressure, or blood sugar, low carbon dioxide levels, Low myo-inositol, Low or high Density Cholesterol particles, low PKA, Low-carb diet, low filtration rate of Kidneys, low glycemic diets, low high-density lipoprotein, or good cholesterol, lumigan drops, Lunatic, Lung infections & recurring, Macroangiopathy, Macrosomia, Macrovascular disease, macula degeneration, Macular degeneration, & edema retina, magnet therapy, major blood vessels blocked, male E D, malformation of fetus in womb, man-made insulin, master gland disorders, Maturity onset diabetes, & of the young, Meal plan limited, measles, Meddi-fast, medical emergency, & research, Medications & side

effects, meds increase beta cell output of insulin, meds interfere with renin kidney blood pressure control cycle, Meglitinides, meglitol, metabolic acidosis, metabolic disease, & syndrome, Metformin, methyglouthiazide, metolazone, metoprolol, Microaneurysm, Microangiopathy, Micronase, microvascular damage, & disease, microvasculature weakness, Migraine headaches, mild acidosis, diabetes, & ketonemia, Mild to moderate hyperglycemia, mind altering pain meds, mind control, Minerals, miniature sweet protein, or peptide, Minimed Paradigm, miscarriage, miscommunication, misunderstanding, mitochondrial diabetes, Mixed dose insulin, Mody 1 to 6, Mody 2 & 3 most common, mono-saccharides, monogenic diabetes, Mononeuropathy, Montignac diet, morbid Obesity, Morbidity, morbidly obese, Mortality, mouth infection, multiple injections daily, mumps, Muscle atrophy, Muscle cramps, Muscle pain, Muscle paralysis, Muscle spasms, Muscle weakness, muscles of stomach and intestines not work properly, mutant insulin, mutations in autosomal dominant gene, mutilation of flesh, myocardial infarction, Nadolol, nail Infections recurring, nandrolone, nateglinide, natural supplements, Nausea or upset stomach, nauseated, nauseous, NDM, near or far-sighted, Necrobiosis lipoidica & diabetorum skin condition on lower leg, neomycin, Neonatal diabetes mellitus, Neovascularization, nerve compression injury, nerve damage, & affecting stomach and intestines, nerve destroyer, nerve pain, nervous systems damaged, nervousness, Nesidioblastosis, Neurogenic diabetes insipidus, neuropathic arthropathy, joint disease, & ulcer, Neuropathy of feet, lower legs, hands, motor nerves, and autonomic nervous system, neuropathy, muscle weakness, and wasting, new age medicines & therapies, new tiny blood vessels grow in retina, niacin, nifedipine, night time release of stress hormones to counter low glucose levels, nitrogenous amine group, noncardioselective meds, no hope - hopelessness, no insulin made, no soundness, wholeness, nor completeness in flesh, No symptoms, No-carb diet, non insulin-dependent diabetes mellitus, non-insulin-dependent adult or childhood diabetes, Nonketotic coma, nonketotic crisis with very high blood sugar, absence of ketoacidosis, great loss of body fluid, & sleepy, confused, or comatose state, Nonproliferative retinopathy (mild, moderate, and severe), not cleanse the blood, not feel feet, not feel touch, pain, heat, and cold, etc, not produce enough insulin, not utilize insulin made, NPH insulin, numbness, noncardioselective meds, noninsulin therapies, numbness on fingers & hands; & toes, feet & lower legs, nutritive sweetener, Oats intolerance, & allergy, Obesity, Onglyza, Ophthalmia, Oral combination therapy, oral anti diabetic meds, Oral glucose gel, & tolerance test, oral hypoglycemic agents, oral medications, organ transplants, osmolarity increased, osmotic diuresis, osmotic diuretics, overdose of insulin, Overt diabetes, overweight, oxprenolol, Oxyhyperglycemia, PADAM, pain from narrowing blood vessels to muscle, & weakness, pain of all

kinds, palsy, Pancreas cancer, Pancreas infection, Pancreas inflammation, Pancreas transplant, pancreas makes little or no insulin when beta cells are destroyed, Pancreatectomy, pancreatic duct blockage, pancreatic cancer, Pancreatitis, Paralysis of bladder, Pascal Photocoagulator, passing through, penicillin, pentoxifylline, Periodontal disease, periodontitis, periot, Peripheral Arterial Disease, Peripheral nerves damage, Peripheral neuropathy, Peripheral vision only, Peripheral vascular disease, Peritoneal dialysis, Permanent Diabetes, Permanent neonatal diabetes mellitus, persistent asymptomatic hyperglycemia, pharmaceutical insulin mix, Photocoagulation, piercing or breaking skin, pinching nerves, & pain, pindolol, pioglitazone, Pituitary gland disorders, placenta hormones block action of Mother's insulin, pneumonia, Podiatry, poisoning with ethylene glycol, or paraldehyde, polycystic ovary syndrome, polydipsia - increased thirst, Polyol pathway, polyphagia, increased hunger, polyols on lenses, Polyunsaturated fats, polyuria - frequent urination, pools of blood in skull, poor Balance, Poor blood circulation in extremities like feet & hands, poor compliance with insulin therapy, poorer healing in feet, pork insulin, Portal-visceral hypothesis, Portmanteau of diabetes and bulimia, Postprandial blood glucose level, potassium deficiency, potassium sparing diuretics, Pramlintide, Prandin, prazosin, Pre-eclampsia, Precose, Prediabetes, prednisone, pregnancy complications, pregnancy high risk, pregnant women with high blood pressure, prescription medications and side effects, proliferative retinopathy, protein in urine, and edema, premature birth, premature death, premature organ failure & from meds, Prepro-insulin, pressure points, Prevention therapy, Pro-insulin, probucol, producing acidic ketone bodies, prognosis, & prognostications by medical staff, etc, Progressive Androgen Deficiency of Aging Male, Proliferative retinopathy, propranolol, Prosthesis foot or leg, protein albumin in urine, Protein complexes on cell not join or bind with insulin, Proteinuria, Proximal diabetic neuropathy, Pruritus, psoriasis, Pulsatile insulin, purified insulins, Quantitative insulin sensitivity, questioning God, Rabson-Mendenhall syndrome, raised intracranial pressure, rapid changes of glucose levels, rapid, deep, and labored breathing of ketoacidosis, or diabetic coma, rashes, rare autosomal dominant form of type 2 DM, rat poison directly attacks beta cells, razperiol, Reactive, & rebound hypoglycemia, recurring bladder or urinary tract infections, recurring gum Infections, recurring nail Infections, recurring pneumonia, Recurring skin Infections, reduced vision, Regular insulin, release of free fatty acids from adipose tissue lipolysis, Remogliflozin etabonate, removal of infected, hurt, or dead tissue, Repaglinide, replace sugar Chemically two amino acids, replacement sweeteners for sugar, reproductive organ problems, resistance to insulin, Respiratory distress syndrome, restricting blood flow, or leaking, retinal detachment, retinopathy, Rezulin, ringworm, Risk factors, Rosiglitazone, rotten legs and feet, rudimentary uterus, rye intolerance, &

**allergy,**

**Saccharin, Saint John's wort, Saint Vincent Declaration, saturated fat, saxagliptin, scar tissue from scatter, focal, or panretinal photocoagulation, scar tissue in retina, scavenging of plaque on arterial walls, scleriosis, Sclerosis of liver, Secondary diabetes, Secretes adrenaline, Segmental transplantation of islet of pancreas, seizure prevention meds, seizures, self-rejection, senokot, Sergliflozin etabonate, sensorimotor neuropathy, sensorineural hearing loss, serious, & severe infection, serious gum disease, severe insulin shock, severe sight, & reading problems, shaky, sharp throbbing or jabbing nerve Pains, shock, short-term insulin coverage, shortages in sodium, potassium, chloride, phosphate, magnesium and calcium, shrinking skin and hands, sickness, side effects, signs of disease, sins of ancestors, fathers, & mothers, siphon, Sitagliptin, skin lesion infection, Skin complications, infections and disorders, skin easily pulls off in big pieces if bumped, skin layers separate from holding water, skin on palm tightens and thickens, Sliding scale Adjusting insulin, Slow-Carb Diet, slow drainage of aqueous, slow healing, somatic neuropathy, somatostatin hormone, some drugs rise blood glucose temporarily or permanently, Somogyi effect, Sorbinil, Sorbitol, sorrow of heart, Spasms of the stomach wall & muscles, spilling point, Spinal cord damage, spironolactone, Split dose insulin, Spontaneous hypoglycemia, squid, stabbing or shooting pains in feet, stable diabetes, Standard Therapy, Staphylococcus or staph infection, Starlix, starvation, or sugar low cause liver to produce glycogen from glycerin backbone of triglycerides & amino acids, statin medications and side effects, statins attacking the proteins in muscles, statins elevate CPK or CK, Steel Magnolias, Stem cell educator, Steroid diabetes, steroid meds, Stiff hand syndrome, still births, Stillman diet, stink, stocking-glove distribution, stomach digestion problems, Stress hyperglycemia, sudden onset diabetes, stressed out, stressfulness, stroke, Subclinical diabetes, subcutaneous catheter, & injection, substantial counterregulatory effects, sucralose, sucrose, sudden drop in blood pressure, sudden onset diabetes, Sugar addiction, sugar alcohol, Sugar Busters, Sugar cane, Sugar crash, Sugar diabetes, sugar low, Sugar Man, sugar too high, sulfa medicines, Sulfonylureas, suppression of spermatogenesis, sweat too much or not at all, sweaty, sweeteners, swelling from holding extra water, swelling of brain tissue, swine insulin, Swollen feet, ankles, or legs, Symlin, symptoms of diabetes, Syndrome X, synthetic hormones & insulin, system-wide nerve damage, Systemic disease, Systolic blood pressure,**

**Tachycardia fast heart rate, Taspoglutide, Team management, Team Novo Nordisk, tender eyed, terror, testosterone deficiency, & replacement therapies, thiazides & thiazide-like diuretic, Thiazolidinediones, Thickening of palm skin, three ketone body substances, Thrifty gene hypothesis, Thrifty phenotype,**

**Thrush, timolol, tingling feeling, tingling, pain, numbness, or weakness in feet and hands, tire easily, tiredness, tissue damage, tolbutamide, Too much insulin in blood, too much insulin feeds insulin resistance, Tormenting, torn retina, toxemia, & of pregnancy, toxic chemicals, & poison, trans-fats, Transient Diabetes, Transient neonatal diabetes mellitus, Trauma, traumatic shock, triamterene, troglitazone, Troisier–Hanot–Chauffard syndrome, troubled, tumor of beta cells in pancreas, tunnel vision, Type 1 diabetes externally triggered auto-immune disease, Types of diabetes, Type 1, type 2, early onset, etc. Ulcer, ulcerated wound, ultra-lente insulin, unable to digest or utilize food properly, unable to produce or use insulin properly, unbelief and doubt, unconsciousness, uncontrolled, undigested food, unilateral foot drop, unstable diabetes, Unsaturated fats, unsteady when stand or walk, Untethered regimen, unusable glucose, urea and creatinine levels high, uric acid crystals in joints causing painful gouty infections, urinary tract infection, urinate often, vaginal aplasia, Vaginitis, vagus nerve damaged or stops working, vanadium, varicose veins, vasopressin, venipuncture, verapamil, very dry mouth, very dry skin, vessel blockage by clot or plaque, vessel disease, vicronomy, virus triggers auto-immune reaction, Visceral neuropathy, vision deterioration, vision loss, visually impaired, Vitamins, Vitrectomy, to remove scar tissue, & blood in eye, vitreous hemorrhage, Vitreous humor, Vomiting often, Vomiting undigested food, vril membrane receptor not insulin bind, warfarin, water pills, water weight, weakness, weakening of capillaries, small blood vessels, & microvasculature, weight gain, wheat allergy, wheat intolerance, Wolcott–Rallison syndrome, World Diabetes Day, wounds corrupt, yeast infections, Zollinger–Ellison syndrome.**

**In the Name and Blood of the Lord Jesus Christ, I bind up each and every demon left, I individually chain, cage, bag and box them. I put them in caves with rocks over the caves with the Light of the Lord shining bright and the angels of the Lord reading Scriptures and praise the Lord continually. I cover us all with the Blood of Jesus. I call upon God's Holy Spirit to fill everybody full to overflowing and to keep chasing out the demons and to restore God's people. In Jesus' Name, I loose legions of the spirits of the Lord, life, health, healing, restoration, wellbeing, sound mind, and a good night's sleep.**

**We thank You Lord Jesus for everything You have done. We give you all the glory and honour, and blessings and praise. In Jesus' Mighty Name and by His Blood. Amen.**

**Pastor T. John Franklin  
Church of Salvation, Healing, and Deliverance
