

List of Communication Disorders Spirits for MD

ALS, ADD, ADHD, abnormal articulating, abnormal growths cancerous or noncancerous, abnormal loudness, abnormal muscle tone, abnormal oversensitivity, abnormal pitch, abnormal quality of sound, Acalculia, acoustic neurinoma, Acoustic neuroma tumor, Acquired aphasia with epilepsy, acquired apraxia of speech, Acquired Auditory Processing Disorder, Acquired deafness, acquired epileptic aphasia, Acquired expressive epileptic aphasia, adrenocorticotropin hormone, Ageusia, Agnosia, agrammatic aphasia, agrammatism, Agraphia, Alport syndrome, alterations in intensity of utterance, alterations in timing of utterance, alterations in vocal control, alterations in vocal pitch, alterations in vocal rhythm, alterations in vocal timing, aminoglycoside antibiotics, Anomic aphasia, anti-convulsant medicines, anti-epileptic medicines, aphasia, aphasia with convulsive disorder, Aphonia, Apraxia of speech, Aprosodia, articulation disorders, Asemia, Asperger syndrome, Astereognosis, Attention Deficit Disorder, Attention Deficit Hyperactive Disorder, Audiometer, Audiometry, auditory dysesthesia, Auditory nerve damage, auditory oversensitivity, Auditory perception issues, auditory processing disorders, Auditory prosthesis, Auditory verbal agnosia, Augmentative Communication Program, Augmentative devices, Aural rehabilitation, autism, Autism Spectrum Disorder, autistic disorders, Autistic epileptiform regression, Autistic regression, Autoimmune deafness, autoimmune diseases like MS, GB, etc, autosomal dominant epilepsy, autosomal dominant epileptic seizures,

Babbling, bacteria or viruses in the ear, bacterial infections, bacterial inflammation, balance disorders, balance problems, Barotrauma, behavioral disorders, behavioral disturbances, behavioral Issues, Benign Paroxysmal Positional Vertigo, birth defects, blepharospasm, blindness, Bogart-Bacall syndrome, born deaf, bound morphemes, brain diseases, brain disorders, brain infections, brain inflammation, brain injury, brain lesions, brain trauma, brain tumors, brain vascular accidents, Brainstem implant, Broca's aphasia, Broca's expressive speech area damage, Broca's expressive speech disorder, Brodmann area damage, Bromocriptine, brute, brutish, brutishness, bully, bullied, bullies, bullying,

central auditory processing disorder, Central Nervous System diseases, Central Nervous System disorders, Central Nervous System vasculitis, cerebral damage, cerebral hemorrhage, cerebral palsy, cerebrovascular accident, challenges to Breath control, challenges to Timing, challenges to Vocal quality, challenges to Vocal Pitch, challenges to Vocal Range, challenges to Vocal Speed, challenges to Vocal Steadiness, challenges to Vocal Tone, challenges to Vocal Volume, change blindness, change deafness, Chemosensory disorders, child abuse, child abuse trauma, child neglect, childhood apraxia of speech, childhood disorders, Childhood Onset Fluency Disorder, childhood schizophrenia, childish speaking, childish thinking, childish understanding, Cholesteatoma, Cholinergic drugs, Chorditis, chronic Otitis media, Circle of friends, Circumstantial speech, Circumstantiality, Clanging, Cleft lip, cleft palate, closed ears, Cluttering, Cochlea damage, Cochlear implant, Cocktail party effect, Cognition impairment, Cognitive disorders, Cognitive and Behavioral Regression, communication disorder terms, communication disorders, Communication impairment, Communication loss, comprehension of language lost, comprehension of language slowed, comprehension of listening lost, comprehension of listening slowed, comprehension of understanding lost, comprehension of understanding slowed, Compulsive talking, Compulsiveness, Compulsivity, Conduction aphasia, Conductive hearing impairment, confuse letters, confuse sounds, consonantal misarticulations, constraint-induced aphasia therapy, Constraint-induced therapy, Cortical deafness, cortical dysfunction, cortico-steroids, cranioencephalic traumatism, Cued speech therapy, cut off ear, Cytomegalo-virus Congenital, damaged hearing and balance organs in the inner ear, deaf-blindness, deaf-muteness, Deafness, decreased attention span, decreased cerebral plasticity, decreased hearing, decreased metabolism in temporal lobes, decreased neuroplasticity, decreased sight, defect in speech, deficient Intonation and stress patterns, deficit in categorization of sounds, deficits in oral language, delay in myelin maturation, delayed language development, demyelination diseases, Derailment, Developmental Alexia, developmental apraxia, Developmental Auditory Processing Disorder, developmental delays, developmental delays in language, Developmental disability, Developmental disorders, Developmental disorder of speech and language, developmental

dyslexia, developmental dysphasia, developmental dyspraxia, developmental expressive language disease, Dialogue in Silence, dieckotic listening, difficulties connecting sounds to letters, Difficulty controlling breathing, Difficulty phonation talking Difficulty phonation singing, Difficulty suppressing salivation, Difficulties controlling speech organs, Difficulties Forming words into sentences, Difficulties making speech sounds, Difficulties sequencing sounds, Difficulties sequencing sounds Within a word, difficulty explaining self, difficulty following conversations, difficulty following stories, difficulty in keeping friendships, difficulty making decisions, difficulty in making friendships, difficulty in reading comprehension, difficulty swallowing, difficulty understanding choices, difficulty understanding questions, difficulty with nonverbal communication, difficulty with pronouns, difficulty with verb tenses, difficulty with reading body language, Difficulty with writing, Disintegrative epileptiform disorder, disjointed words, Disorder of written expression, distorted hearing, disturbance in language processing, Dizziness, dizzy, Dopaminergic psychostimulants, Dream speech, drug abuse, Dysacusis, Dysarthria, Dyscalculia, Dysequilibrium, Dysfluency, dysfunction of outer or middle ear, Dysgeusia, Dysgraphia, Dyslexia and related specific developmental disorders, Dyslexia in fiction, Dyslexia interventions, Dysosmia, Dysphagia, Dysphonia, Dyspraxia of speech, Dysprosody, Dystonia,

ear heavy & not hear, Ear infections, ears not attentive, ears to hear and hear not, ears to hear and not percieve, ears to hear and not understand, Earobics, Echoic memory issues, Eckolalia repeating, ectopic or misplaced cells in auditory cortical areas, embolism, emotional disorders, emotional & behavioral problems, emotionalism, encephalopathies, Endolymph, epileptic seizures, epilepsy, episodes of vertigo, episodes of hearing loss, episodes of tinnitus, episodes of sensation of fullness in the ear, Epistaxis, Esophageal atresia, Esophageal cancer, Esophageal dysphagia, Esophageal leimomyoma, Esophageal rings, Esophageal webs, Esophagial diverticula, esophageal voice, excessive eye blinking, excessive fluid in labyrinth, Expressive aphasia, Expressive language disorder and lost skills, Expressive language disorders, extended paraphasia, Extensions to the International Phonetic Alphabet, extra bone in inner ear, extradural hematoma, extreme fear, eye damage, eye defects, eye disorders, eyes to see and see not, eyesight

disorders, eyesight limitations,

Fast ForWord, faulty syntactic structure, fears of all kinds, fluency disorder, fluent aphasia, fluid in the ear, fluid in the labyrinth, folly, fool, foolish, foolishness, foolishness bound in heart, Foreign accent syndrome, frequent ear infections,

gastroesophageal reflux, genetic disorders, Gerstmann syndrome, Glaucoma, global aphasia, glue ear, gradual hearing loss, gradual loss of sight,

head or neck injuries, head trauma, Headache, Healing the deaf mute of Decapolis, hear buzzing, hear explosion, hear ringing, hear roaring, hearing and balance nerve damage, Hearing diseases, Hearing disorders, Hearing impairments, Hearing limitations, hearing loss, hearing loss and related disorders, heart defects, hereditary conditions, Hereditary hearing impairment, herpes viruses, high-functioning autism, hinder control of lips, hinder control of lungs, hinder control of throat, hinder control of tongue, hoarse voice, Hoarseness, Hyper neurotic diaphragma contractions, hyperactive, hyperactiveness, Hyperactivity, Hyperlexia, hypermetabolism, Hypogeusia, hypoperfusion, Hyposmia, hysteria, hysterical,

Ideomotor apraxia, Illiteracy, Illiterate, illusion of movement, immature, immaturity, impaired social communication, hearing, Impaired memory, Impaired short-term memory, impaired social communication, impaired social interaction, impaired social communication, speech, impaired vision, impairments in auditory processing, impairments in efficiency of vocal communication, impairments in speech production, impairments in audibility, impairments in intelligibility, impairments in naturalness, impairment in understanding pragmatic areas, impairment in writing, impairment of the nervous systems of brain or nerves, impairments in speech-sound production, impairs articulation of speech, impairs phonation, impairs prosody, impairs resonance, impairs respiration, inability to correctly produce speech sound phonemes, inability to differentiate, inability to express thoughts verbally, inability to pronounce sentences, inability to pronounce words, inability to recognize, sounds, inability to repeat sounds, inability to understand sounds, inattention, inattentive, inattentiveness, inco-ordination of face muscles, infantile acquired aphasia, infections, infection of vestibular nerve,

inflammation, inflections, injury to middle ear, inner ear damage, inner ear infections, involuntary movements, irritation of vocal cords, irritation of vocal folds, itching ears,

Kallmann's syndrome, kidney damage, kidney disease, King-Kopetzky syndrome,

Labyrinthine hydrops, Labyrinthitis, lack of blood to brain, lack of oxygen to brain, Landau-Kleffner syndrome, Language delay, Language deterioration, Language disorders, Language processing disorders, Languages by Writing System, laryngeal framework surgery, Laryngeal neoplasms, Laryngeal nodules, Laryngeal papillomatosis, Laryngeal paralysis, Laryngectomy, Laryngitis, Laryngo-plasty, larynx impairment, Late Language Emergence, lateralization problems, learned nonuse, Learning disabilities, Learning disorders, left-hemisphere lesions, LENA Foundation, light-headedness, linguistic weaknesses of children, Linguistics, lisp, Literacy impaired, Logopenic progressive aphasia, LORD not give a heart to perceive, eyes to see, and ears to hear, loss of sight, loss of hearing, loss of taste, loss of voice, lost hearing before acquiring language, low vision,

Management of dyslexia, Mastoid disorders, Mastoid surgery, Maynierre's disease, medial temporal lobe damage, medialization, Meige syndrome, Melodic intonation therapy, Meningitis, mental disorders, mental retardation, middle ear damage, middle ear diseases, middle ear disorders, mild autism, Misarticulation, Mixed Receptive-Expressive Language Disorder, Mixed transcortical aphasia, mixing left & right, mixing directions, momentary disruption of voice, morphosyntactic leitsymptom, Motor function issues, Motor skills disorders, Motor speech disorders, movement disorder, MSG, multiple Sclerosis, multiple subpial transection surgery, Multisystem developmental disorder, muscle weakness, muscles of larynx disorder, muscular paralysis, muteness,

Neck mass, nerve injury to brain, neurocysticercosis, Neurofibromatosis, Neurogenic communication disorder, neurological disorders, neuropaathies, Neuro-plasticity, neuropsychologic disturbances, Neuropsychology, night seizures, Noise exposure, Noise-induced hearing loss, non-fluent aphasia, noncancerous wart-like tumors, Nonsyndromic hereditary hearing

impairment, nonverbal learning disability, not discern sounds, not give ear to hear the Lord, not hearken, not incline ear to hear, not listen, not pay attention, not understand verbal instructions, Nuffield Speech and Language Unit,

objective vertigo, omitting function words, organizational issues, oromandibular dystonia, Other speech disturbances, Otitis externa, Otitis media, Otosclerosis, Ototoxic antibiotic drugs, Outer ear disorders,

Palsy, Papillomavirus, Paragrammatism, paralysed vocal cord, paralysis of speech muscles, paraphasias, parkinsons disease, Parosmia, People with dyslexia, Perception, Perilymph fistula, peripheral hearing, peripheral vision only, or dominant, pervasive developmental disorders, Pharmacotherapy, Pheromone chemicals, phobias, phonemic disorders, phonetic disorders, phonological deficit hypothesis, Phonological Disorder, physical exertion, physical impairments, Piracetam, poor attention, poor memory, Post-nasal drip, Postlingually deafened, Pragmatic language impairment, predispositions to genetic disorders, prednisone, Prelingually deafened, Presbycusis, Pressure of speech, Primary Progressive Aphasias, problems doing multi-step directions given orally, problems with verbal communication, problems understanding verbal communication, Progressive nonfluent aphasia, Prosopagnosia, Pseudowords, psychiatric syndrome, Puberphonia,

Rare childhood neurological syndrome, Reading acquisition delays, reading delays, reading disorders, rebellion, rebellious, rebelliousness, receptive aphasia, Receptive language disorder, recurring movements, recurring sounds, recurring tics, reduction of air pressure, refuse to hearken, refuse to hear the Word of God, Regression, Regressive, Regressive autism, Regressiveness, Reinke's edema, renal tumors, repeated exposure to sounds over 90-decibel for a long time, repeated middle ear infections, Repeating words, Repeating phrases, restricted behaviors, repetitive behaviors,

Scanning speech, scar tissue in ear, Schizophasia, Scholastic skills, selective hearing, Semantic Dementia, semantic pragmatic disorder, sensorineural hearing loss, sensory aphasia, sensory dysprosody, Sensory impairments, short attention span, signs of communication disorders, Singing and melodic intonation therapy, slow auditory processing, slow learner,

socialization disorders, sound localization problems, Sound vocalization limitations, Spasmodic dysphonia, Spasms, Spatial hearing loss, special education programs, Specific developmental disorders of speech and language, Specific language impairment, Specific speech articulation disorder, Specific spelling disorder, Speech acquisition disorders, speech and feeding problems, Speech and language disability, Speech and language disorders, Speech and language impairments, Speech and language regressions, Speech and voice issues, Speech delays, Speech disfluency, Speech disorders, speech losses, Speech impairments, Speech impediments, Speech perception disorders, Speech processor disorders, Speech regressions, Speech repetition disorders, Speech sound disorder, speech therapy, Speech-Language Pathology disorders, Spelling problems, spirit of slumber, spoken communication disorders, Stammer, Stammering, Stilted speech, Stimulable sounds, stop ears from hearing, stop listening, stopped up ears, strokes, & related brain damage or paralysis, structural defects, Stutter, Stuttering, sub cortical lesions, subjective vertigo, Sudden deafness, sudden loss of speech, sudden loss of language, sudden loss of the ability to move a body part, sudden onset of dizziness, sudden onset of spinning, sudden onset of vertigo when moving the head, surgical accident, Swallowing disorders, Symbolic dysfunctions, Symptoms of communication disorders, Symptoms of head and neck, Syndromic hearing impairment, Tangentiality, temporal discrimination, temporal gap detection, temporal integration, temporal masking, temporal ordering, temporary deafness, temporary hearing loss, temporary problems pronouncing words, the hiccups, thinking skills impaired - perception, memory, awareness, reasoning, judgment, intellect, and imagination, etc, thought Derailment, Thought disorders, Throat disorders, thrombosis, thyroid problems, thyroidism, Thyroplasty, Tinnitus, Tip of the tongue, Tone deafness, tongue tied, Tourette syndrome, Tracheostomy, Transcortical motor aphasia, Transcortical sensory aphasia, Transcranial magnetic stimulation, Transcranial messages interruptions, Transcranial messages mix-ups, trauma to the brain, trauma to the larynx, traumatic shock, trouble paying attention, Tuberous Sclerosis, Tympanoplasty,

Umami, unable to understand written or spoken language, under-water

hearing, under-water hearing distortion, unintelligible speech, unsteady-sounding voice, unteachable, unteachableness, Usher syndrome,

vasospasm, Velocardiofacial syndrome, verbal abuse, & trauma, verbal processing disorder, verbal processing disorder, Vertigo problems, very loud impulse sound, Vestibular disorders, Vestibular Neuronitis, Vestibular schwannoma, Vestibular system malfunction, viral infections, viral inflammation, Visual agnosia, vocal abuse, vocal misuse, voice box impairment, Vocal cord disorders, Vocal cord paralysis, Vocal cord paresis, Vocal fold cysts, Vocal fold disorders, Vocal fold nodules, Vocal tremor, Voice disorders, Voice distortion, Voice disturbances, Voice impairments, voice disorders,

Waardenburg syndrome, weakness of speech muscles, Wechsler Adult Intelligence Scale, Wernicke's aphasia, Wernicke's area damage, Wernicke's disorder, word salad, word Substitutions, Writing system problems,

In the Name and Blood of the Lord Jesus Christ, I bind up each and every demon left, I individually chain, cage, bag and box them. I put them in caves with rocks over the caves with the Light of the Lord shining bright and the angels of the Lord reading Scriptures and praise the Lord continually. I cover us all with the Blood of Jesus. I call upon God's Holy Spirit to fill everybody full to overflowing and to keep chasing out the demons and to restore God's people. In Jesus' Name, I loose legions of the spirits of the Lord, life, health, healing, restoration, wellbeing, sound mind, and a good night's sleep.

We thank You Lord Jesus for everything You have done. We give You all the glory and honour, and blessings and praise. In Jesus' Mighty Name and by His Blood. Amen.
