

List of Dementia Spirits for MD

abuse of all types, child abuse, co-workers abuse, cultural abuse, elder abuse, emotional abuse, employer abuse, employee abuse, gang abuse, institutional abuse, judicial system abuse, mental abuse, organized crime abuse, parental abuse, peer abuse, psychological abuse, physical abuse, religious abuse, ritual abuse, self abuse, sexual abuse, societal abuse, spiritual abuse, spousal abuse, systemic abuse, verbal abuse, etc, alcohol abuse, canniboid abuse, cannibis abuse, drug abuse, fentinol abuse, hallucinogens abuse, illegal drug abuse, illicit drugs abuse, inhalants abuse, medicines abuse, opiod abuse, psychoactive substances abuse, stimulants abuse, street drug abuse, THC abuse, underground economy abuse, unions abuse, etc,

addiction in chemistry of brain, Addiction medicine, addiction proneness, addiction vulnerability, Addiction psychiatry, Addiction Psychology, Addiction recovery groups, Addiction Research Centers, addiction reward, Addiction therapy, Addiction to alcohol, Addiction to behaviors, Addiction to caffeine, Addiction to candy, Addiction to computer, Addiction to drugs, Addiction to facebook, Addiction to food, Addiction to gambling, addiction to intensity, Addiction to junk food, Addiction to medicines, Addiction to nicotine, Addiction to pop, Addiction to pornography, addiction to sex, Addiction to social media, Addiction to soap operas, Addiction to sports, addiction to substances, Addiction to sugar, Addiction to twitter, Addiction to TV, Addiction to video games, Addiction to work, etc, addiction to, craving for and bondage to any vice, Addiction to other things after quitting original vice, Addiction top priority in life, Addictive Behavior, addictive behavior personality, addictive belief system, addictive impulses, Addictive patterns, Addictive personality, addictive Recognition Technique, addictive tendencies, addictive tragedies,

abnormal deposits of alpha-synuclein protein in the brain, abnormal mental state that affects memory and learning, Absent-minded professor, Absent-mindedness, abuse victim forget abusive situation, ACA, accelerated forgetting, accretion of iron, act out dreams, Active recall, acute affects of alcohol consumption, Acute aphasia, acute anticholinergic syndrome, Acute disseminated, Adaptive memory impairment, Adaptive memory loss, ADD, ADD maintenance, ADD treatment, ADHD, ADHD maintenance, ADHD treatment, Adrenoleukodystrophy, Advanced sleep phase disorder, agitate, agitated, agitate-er, agitating, agitation, aggression, aggressive,

aggressiveness, aging effects on memory, Agnosia, aids in memory, Akathisia, alcoholic, alcoholism, alcohol withdrawal, alcohol-related amnesia, Alexander, Alois Alzheimer, Alpers' disease, Alpha secretase, altered level of consciousness, altered mind, altered memory, altered mental state, alternative medicine, alternative therapies, Alzheimer's disease, biomarkers, & prions, Amaurosis fugax, Amineptine, Amitriptyline, Amitriptylinoxide, Amnesia, Amoebic, Amoxapine, amyloid angiopathy, amyloid plaques, amyloid precursor protein, amyloids in the brain, Anterograde amnesia, anticholinergic agent, anticholinergic drugs, anticholinergic toxicity, antihistamines affects on memory, Antinicotinic agents, Antimuscarinic agents, antiparkinsonian agent, Antipsychotics, anxiety, anxious, anxiousness, APH-1, Apolipoprotein E, Apraxia, Art of memory, arteriovenous malformation, Arts & Minds, Asendin, Associative visual agnosia, Ataxia telangiectasia, atenolol, Athetosis, Atkinson-Shiffrin memory model, Atropine, Attention deficit disorder, Attention deficit hyperactive disorder, atypical parkinsonian syndromes, Auditory Agnosia, auditory Hallucinations, autism disorders, Autism affecting working memory, autobiographical memory impairment, autobiographical memory loss, autoimmune diseases, Avid Radiopharmaceuticals, BACE1-AS, Barney's Version, Barrel cortex, Basal ganglia disease, Basic concepts forgotten, Before We Forget, benevolent hallucinations, Benztropine, benzhexol, Benzotropine, Beta amyloid, Beta-secretase 1, Binding problem, Biperiden, Boice, & Boyce, Biochemistry of Alzheimer's, birth defects, Blackout, Blepharo-spasm, block thoughts being verbalized, block words on tip of tongue, blocked veins exiting brain, blocked veins exiting brain not removing toxins, blocked veins exiting brain not removing metals, etc; blocked capillaries in brain, Books about Alzheimer's, Books about dementias, Brain abscess, Brain aneurysm, Brain cancers, Brain damage, Brain diseases, Brain disorders, Brain hemorrhage, Brain herniation, Brain infections, Brain inflammation, Brain injury, Brain trauma, Brain tumors, brain-created toxins, Brain shrinking with age, Brain shrinking prematurely from excess tofu, brainwash, brainwashed, brainwash-er, brainwashing, brainwashing techniques, breakdown of blood-brain barrier, Bupropion, Butriptyline, caffeine affects on memory, CAM-FAK syndrome, Can't Afford to Grow Old, can't express thoughts, can't verbalize visual memory, Canavan, Cannabis slows memory, Caprylidene, Caregiving and dementia, Cataplexy, Cavernous sinus thrombosis, cell to cell connections in brain lost, Central pontine myelinolysis, cerebellar dysfunction, Cerebral edema, Cerebrovascular, Character amnesia, Characters with memory disorders, Charles Bonnet

syndrome auditory version, child abuse, Childhood amnesia, childish speaking, childish thinking, childish understanding, Chlorpheniramine, chlorpromazine, cholinergic dysfunction, cholinergic excess, Chorea, Choreo-athetosis, chronic excessive alcohol consumption, chronoceptive Hallucinations, Chunking, Circadian rhythm sleep disorder, circulatory reasoning, circulatory thoughts, Clomipramine, clozapine, Cluster headaches, Cluster migraines, etc; cognitive decline, Collective memory impairment, Collective memory loss, comatose, Combined type ADHD-C, Command hallucinations, Concurrent overlap, concussion, Confabulation, confused, confusing, confusion, congophilic angiopathy, Context-dependent memory impairment, Context-dependent memory loss, convoluted logic, Cough suppressants, Creutzfeldt-Jakob's disease, Cryptomnesia, C S F, Cue-dependent forgetting, Cultural memory impairment, Cultural memory loss, Cultural perspectives, damage from diabetes to capillaries & nerves in brain, Damage to anterior temporal brain regions, Damage to frontal temporal brain regions, damage to occipital lobes in brain, damage to parietal lobes in brain, death of brain cells, Decay theory, declarative memory impairment, declarative memory loss, decrease in estrogen, decreased activation in the basal ganglia and frontal cortex, degeneration of memory processes, degeneration of the blood-brain barrier, degeneration of the central nervous system, Degenerative dementia, Degenerative mind diseases, Delayed sleep phase disorder, delirants, delirium tremens, Dementia With Dignity, Dementia with Lewy bodies, Demexiptiline, Demyelinating disease, Demyelination of nerves, M S, G B, etc; Depressed, Depressing, Depression, Desipramine, despair, despondancy, despondant, deterioration of subcortical structures, destracted, distracting, distractions, Dextromethorphan, Diabetes, all types, Dibenzepin, Dicyclomine, Dicycloverine, difficulty acquiring new information, difficulty retaining new information, difficulty with free recall, delusional perceptions, delusions, Dimetacrine, Diminished memory Capacity, Dimenhydrinate, Diphenhydramine, disilllusioned, disilllusions, Disinhibition, disorientation, disproportionate retrograde amnesia, distractions, distressed, diversionary distractions, diversions, Donepezil, dopamine low, Dosulepin, Doxacurium, Doxepin, Doxylamine, drugs killing brain cells, Dual-task paradigm, dying at grace, dysphoria, dysfunction in working memory, Dyskinesia, Dystonia, Dayja vu, ESP, EST, Early-onset Alzheimer's, Early-onset dementias, easily distracted, Echoic memory impairment, Echoic memory loss, Effect of Alcohol on Memory, Eidetic memory impairment, Eidetic memory loss, El Corunya, electro-chemical imbalances in brain, Emotion and memory, emotional

abuse, emotional disturbance, emotional trauma, encephalitis, Encephalomyelitis, encephalopathy, Encoding, endocrine diseases, environmental factors, Epidural abscess, epileptic seizures, Episodic memory impairment, Episodic memory loss, Episodic-like memory impairment, Episodic-like memory loss, equilibrioceptive Hallucinations, Essential tremor, Euphoria, evil memory recall, evil audio memory recall, evil visual memory recall, Exceptional memory impairment, Exceptional memory loss, Excitatory postsynaptic potential, Exosomatic memory impairment, Exosomatic memory loss, Explicit memory impairment, Explicit memory loss, exposure to continuous stress affects on hippocampus, Extrapyrarnidal, extremely detailed autobiographical memory, False memory syndrome, Familial hemiplegic, family line curses, fatal brain disease, fatigue, fear of having dementia diseases, fear of the future, fear of not being able to care for self, feelings of frustration, fibrils, Films about Alzheimer's, Films about dementias, Flashback with psychology, Flashbulb memory impairment, Flashbulb memory loss, Florbetapir, Fluacizine, Fluctuating alertness, Fluctuating attention, Fluctuating cognition, Focal, Foix-Alajouanine syndrome, Forget Me Never, Forgetful Not Forgotten, forget what going to do, forget what doing mid way, forget what saying mid way, Forgetting, forgetfulness, Forgetting curve, Foville's, Fragmentation of memory, Free recall, inhibited, freezing words on tip of tongue, frequent confabulation, Friedreich's ataxia, from a neurological disorder, frontal lobe damage, Frontotemporal dementia, Frontotemporal lobar degeneration, Fugue state, Functional fixedness, frustrate, frustrated, frustrate-er, frustrating, frustration, Fuzzy-trace theory, GAB2, Gamma secretase, ganglion blockers, General somatic hallucinatory sensations, Generalised, Generation effect, genetic defects, genetic risk factors, geriatric memory dysfunction, Glycopyrrolate bromide, Glycopyrronium bromide, gustatory Hallucinations, hallucinogenic drugs, hallucinogenic meds, hallucinated commands, Hallucinations in any sensory modality - visual, auditory, olfactory, gustatory, tactile, proprioceptive, equilibrioceptive, nociceptive, thermoceptive, & chronoceptive; Haptic memory impairment, Haptic memory loss, HD, Headache, healing of the memories, Hemiballismus, Hepatic encephalopathy, hereditary, Herpes Simplex Virus infection, Herpes viral encephalitis, Hexamethonium, high cholesterol, higher neuritic plaque density, Hindsight bias, Hinduism, hippocampal damage, Human memory process interrupted, Huntington's Disease, Hydrocephalus, Hyoscine, Hyoscyamine, Hyperfocus, Hyperglaucoma, Hypersomnia, Hypertension, Hyperthymesia, Hyperthymestic Syndrome, Hypnagogic hallucinations, hypnopompic

hallucinations, hypoglaucoma, hypoglaucomatic reaction from confusion to coma, hypotension, hypnosis, hypnotist, hypnotize, hypnotized, hypnotize-er, hypnotizing,

I Forgot to Tell You, Iconic memory impairment, Iconic memory loss, Idiopathic intracranial hypertension, illusion, Illogical thinking, imagery, Imipramine, Imipraminoxide, immediate memory loss from head injury, immediate memory response poor, immune system attacking brain, impaired short-term memory, impaired mid term memory, impaired long term memory, impaired working memory, Implicit memory impairment, Implicit memory loss, Inability to concentrate, inability to forget, inability to recognize people, inability to recognize things, inability to remember, inability to sustain a train of thought, inattention, inattentive, inattentiveness, Incoherent speech, increased hippocampal neurofibrillary tangles, Indirect tests of memory, Inductionism, Inductive reasoning, infectious prions, inherited progressive disorder of the brain, Inhibitory postsynaptic potential, Innale, Irritable, Irritability, Insomnia - temporary to permanent, Institutional memory impairment, Institutional memory loss, Intention tremor, Interference theory, Intracranial hypertension, Intracranial hypotension, Involuntary memory impairment, Involuntary memory loss, Iprindole, Ipratropium, irreversible dementia, islands of memory impairment, islands of memory loss, isoprenoid changes in Alzheimer's,

Jet lag, Kleine-Levin, Korsakoff's syndrome, Krabbe, Kuru, Kynapcin, lack of oxygen to brain, Lacunar amnesia, Lacunar stroke, lapse of memory, Lateral intraparietal cortex, Lateral medullary, lateral temporal lobe epilepsy, Leigh's disease, lesions on brain, Lethologica, Levels-of-processing effect, Lewy body dementia, Lewy bodies, Lewy clumps affecting the autonomic nervous system, Lewy clumps affecting the central nervous system, Lewy neurites, Limbic system, Link-word, Lofepamine, Logopenic progressive aphasia, long shadows, long-lasting symptoms, Long-term depression, Long-term memory impairment, Long-term memory loss, loose track of time, loratadine, loss of intellectual faculties, Lost in the mall technique, low or no protein diet, luciferian abilities, luciferian powers, luciferian involvement, Ludiomil, lupus,

Mad Cow Disease, magic abilities, magic involvement, magic powers, making up or inventing information to compensate for poor memory, malevolent hallucinations, malnutrition, Maprotiline, Marchiafava-Bignami disease, Match-to-sample task, MCA, Meaningful learning, Mecamylamine, medial temporal lobes surgically altered, medial temporal lobes damaged, MegaMemory impairment, MegaMemory loss, Meige's, Melitracen, Memento Mori, Memorialization, memories from past inhibited, Memories of tomorrow,

Memorization inability, Memory disorders, memory impairment, memory loss, Memory loss & aging, Memory and social interactions, Memory and trauma, Memory augmentation, Memory Bridge, Memory conformity, memory consolidation, memory deficits, memory disorders, memory dysfunction, Memory development, Memory disorders and aging, Memory errors, Memory for the future, memory impairment, memory inhibition, memory implantation, Memory improvement therapy, memory problems, Memory rehearsal, Memory span short, memory limited, Memory sport, Memory work, unable to do, Memory-prediction framework, Meningoencephalitis, mental abuse, Mental image, Mere-exposure effect, messed up memory, messed up short term memory, messed up mid term memory, messed up long term memory, messed up remembering things, messed up recalling things, metabolic disturbances, metabolic disorders, metals block capillaries in brain, Metamemory impairment, Metamemory loss, Metapramine, Metoprolol, MFC, Migraines, Mild cognitive impairment, Millard-Gubler, mind altered, mind altering medicines killing brain cells, mind blocking, mind blanking, mind blinding, mind blitzing, mind freezing, mind slowing, etc; mind control, mind games to control, mind idolatry, mind occult, mind oppression, mind programming, mind racing, mind reading techniques, mind sciences, mind religions, mind Wandering, Misattribution of memory, misfolded proteins, Misinformation acceptance, Misinformation effect, Mitochondrial disease, mix-up thoughts, Mnemonic, Mnemonist, Mnemosyne, moderate retrograde amnesia, Mood-dependent memory, mood disorders, mood fluxuations, mood swings, Morvan's syndrome, Motivated forgetting, Motor learning, movement disorders, Multi-infarct dementia, multiple memory system theory, Multiple sclerosis, multiple system atrophy, Multiple trace theory, Muscle deterioration, Muscle impairment, Muscle loss, Muscle memory, muscular relaxant, Music-related memory impairment, Music-related memory loss, Musical hallucinations, Myelitis: Poliomyelitis, myelopathy, Myoclonic epilepsy, Myoclonus, Nachgewahren, Narcolepsy, National Institute on Aging, Negative effects of caffeine on long-term memory, Negative transfer memory, Neprilysin, Neuritic plaques, neuritic plaques in the brain, Neuroanatomy of memory, neurodegeneration, neurodegenerative dementia, neurodegenerative disease, neurofibrillary tangles, Neuroinflammation, neuroleptics, Neuromyelitis optica, Neuronal memory allocation, Neuroplasticity, new age abilities, new age involvement, new age medicines, new age powers, new age religion, new age therapies, Nicastrin, NIN C D S-A D R D A Alzheimer's Criteria, Nitroxazepine, nociceptive Hallucinations, N M S, Non-24-hour sleep-wake disorder, Nonsynaptic plasticity, Nortriptyline, Noxiptiline,

Obstructive, occult abilities, occult healing methods, occult involvement, occult mind control, occult powers, occult therapies, oculomotor abnormalities, Olfactory memory impairment, Olfactory memory loss, olfactory Hallucinations, Ondine's curse, Opipramol, Orphenadrine, Orthostatic hypotension, Oxidative stress, Oxitropium bromide, Oxybutynin, oxygen deprivation to brain, pairing association to aid memory, paranoia, paranoid, paranormal abilities, paranormal involvement, paranormal powers, Parkinson-plus syndromes, Parkinson's Disease, Parkinson's disease dementia, Parkinsonism, paroxysmal, Peduncular hallucinosis, penetrating lesions, permanent symptoms, persistent hypertension, persisting amnesia, Personal event memory impairment, Personal event memory loss, physical stresses, Pick's, Pipofezine, Pittsburgh compound B, Politics of memory, poor attention span, poor episodic memory, poor memories from before age five and days that were uneventful, porphyria, positive reinforcement, Positivity effect, Post-traumatic Amnesia, post traumatic shock disorders, post traumatic stress disorders, Postencephalitic, Posthypnotic amnesia, precognition, Predominantly hyperactive-impulsive type ADHD-HI, Predominantly Inattentive type ADHD-PI, premature aging, Prenatal memory blocked, Primary progressive aphasia, priming, procedural memory impairment, procedural memory loss, profound amnesia, progressive deterioration of memory, progressive deterioration of thinking ability, progressive dementias, Promethazine, Propantheline bromide, Propizepine, proprioceptive Hallucinations, Prosopagnosia, Prosopamnesia, Prospective memory impairment, Prospective memory loss, protein aggregates in cortical areas of brain, Protein aggregation, proteopathy, Protriptyline, pseudohallucination, psychiatry, psychiatry therapies, psychic abilities, psychic powers, psychic phenomena, psychoactive stimulant drug, Psychogenic amnesia, psychology, psychology therapies, Quinacrine, Quinupramine, rapid rate of cognitive decline, Reading span task, Reasoning system impairment, Recall impairment, Recall loss, recall & relive traumatic incident, Recognition memory impairment, Recognition memory loss, Reconstruction of incident, Recovered memory therapy, Redintegration, redirect thoughts, Related concepts, Remember, Remember versus know judgements, eminence bump, remote spatial memory impairment, remote spatial memory loss, Repressed memory, Respiratory depression, result of damage to neuroanatomical structures that hinders the storage, retention and recollection of memories; Retrieval-induced forgetting, retrograde amnesia, Retrospective memory impaired, Retrospective memory loss,

reversible dementia, ritual abuse, & false memories, Reye's, Rosy retrospection, Rote learning, SRA & false memories, SSRI meds, sarcoidosis, satanic abilities, satanic involvement, satanic powers, scatter brain, scattered thoughts, Schilder's disease, Scopolamine, Seizure of epilepsy, selective memory impairment, selective memory loss, Selective omission, Selective retention, Self-referential encoding, Semagacestat, Semantic memory impairment, Semantic memory loss, senile, senility, senior lapses, senior moments, Sense amplifier, Sensory deprivation hallucination, Sensory memory impairment, Sensory memory loss, Serial memory processing, Serial position effect, Seven Sins of Memory, severe cognitive impairment, severe head injury, severe neurological disorder, Short-term memory impairment, Short-term memory loss, Simulated presence therapy, Simultanagnosia, Sleep and memory, Sleep apnea, & other sleep disorders, slow deterioration, slowness of movement, Solifenacin, Soluble low density lipoprotein receptor-related protein, Somatosensory agnosia, sonia, SORL1, Source amnesia, Source-monitoring error, Souvenaid, Spaced repetition, Spaced retrieval, Sparse distributed memory, Spasmodic torticollis, Spatial memory impairment, Spatial memory loss, Spinal cord compression, Spinal cord injury, Spreading activation, Status dystonicus, Status epilepticus, Stiff person, Stolen Memories, Storage of memory impairment, Storage of memory loss, Stress, Stressful, Stressfulness, Striatonigral degeneration, stroke, Subvocalization, sudden and unexpected change due to heart attack or stroke, Sundowning, Suppressed memory, switching thoughts, synucleinopathy, Syringobulbia, Syringomyelia, systemic lupus erythematosus, tactile Hallucinations, Tau protein, Tauopathy, TeCAs, telepathic, telepathy, telescoping effect, temporary amnesia, temporary memory loss, Tension, Tetris effect, Thanmathra, The Alzheimer Case, The Forgetting, thermoceptive Hallucinations, thiamine (vitamin B1) deficiency, thinning of blood-brain barrier, Thought suppression, thyroid disease, Tianeptine, Time-Based Prospective Memory impairment, Time-Based Prospective Memory loss, Tiotropium bromide, tip of the tongue effect, tofu & other brain shrinking prematurely substances, Tolterodine, Too much iron in body, Toxic encephalopathy, toxic metals too high levels in brain, toxins trapped in brain, Transactive memory impairment, Transactive memory loss, trans cranial signals interfered, Transient epileptic amnesia, Transient global amnesia, transient amnesia, transmissible spongiform encephalopathies, Transsaccadic memory impairment, Transsaccadic memory loss, Transverse myelitis, trauma, trauma victim forget traumatic situation, traumatic amnesia, Traumatic brain injury, traumatic incidents, traumatic memories,

traumatic memory recall, traumatic audio memory recall, traumatic visual memory recall, traumatic shock, traumatic stress, Tremor, Tricyclic antidepressants, TCAs, trihex, Trihexyphenidyl, Trimipramine, Tropical spastic paraparesis, Tropicamide, Tubocurarine, Twilight sleep, Type 2 diabetes & side effects, Umeclidinium bromide, uncontrolled thoughts, ungodly dreams, ungodly visions, ungodly mind control, ungodly mind links, Validation therapy, Vascular dementia, Vascular myelopathy, vegetarian diet, Verbal memory impairment, Verbal memory loss, Viral encephalitis, Visual Agnosia, visual Hallucinations, Visual memory impairment, Visual memory loss, Visual short-term memory impairment, Visual short-term memory loss, Visual thoughts blocked from being verbalized, vitamins &/or mineral deficiency, Weapon focus, Weber's Syndrome, Wernicke-Korsakoff's Syndrome, widespread deposits of abnormal clumps of protein form in neurons of the diseased brain, Wilson's disease, witchcraft abilities, witchcraft involvement, witchcraft powers, Working memory impairment, Working memory loss, working memory training, worry, Zaven Khatchaturian,

In the Name and Blood of the Lord Jesus Christ, I bind up each and every demon left, I individually chain, cage, bag and box them. I put them in caves with rocks over the caves with the Light of the Lord shining bright and the angels of the Lord reading Scriptures and praise the Lord continually. I cover us all with the Blood of Jesus. I call upon God's Holy Spirit to fill everybody full to overflowing and to keep chasing out the demons and to restore God's people. In Jesus' Name, I loose legions of the spirits of the Lord, life, health, healing, restoration, wellbeing, sound mind, and a good night's sleep.

We thank You Lord Jesus for everything You have done. We give You all the glory and honour, and blessings and praise. In Jesus' Mighty Name and by His Blood. Amen.

**Pastor T. John Franklin
